ADDING STS-m

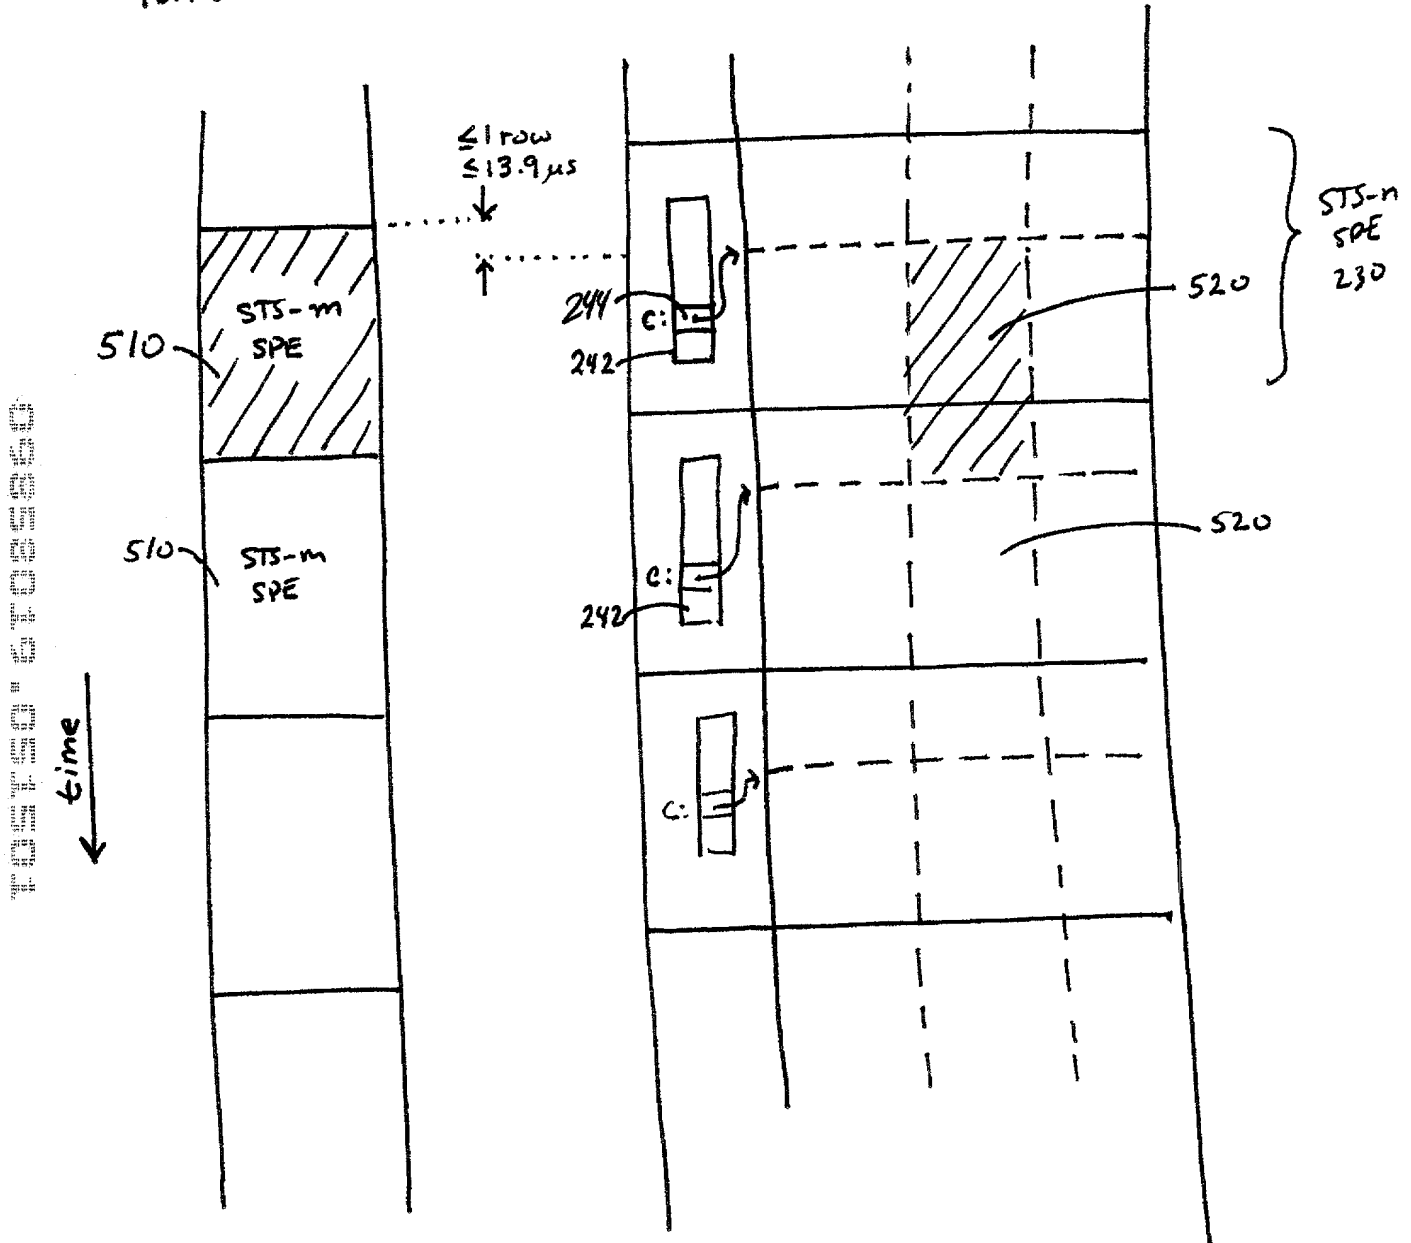

FIG. 5

FIG. 6 is a schematic diagram of a system for adding a virtual time slot (VT) to a time slot (TS) in a time slot table (TST). The diagram shows a time slot table (TST) with multiple rows and columns. The rows represent time slots, and the columns represent different time slots. The diagram illustrates the process of adding a new VT to an existing TS. The process involves identifying the TS to be added (620) and the VT to be added (630). The diagram shows the TS (620) and the VT (630) being added to the TST. The diagram also shows the resulting TST after the addition (632, 634). The diagram is labeled "FIG. 6" and "ST5-n SPE 230".
